

August 18, 2014

Dear Colleagues,

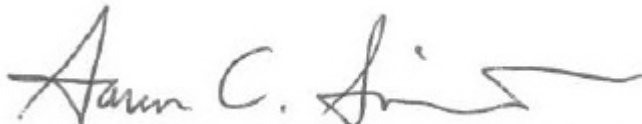

The age of transparency is here and judging from the number of letters we've received from architectural firms lately, you are no doubt sensing the same imperative as well.

We've received many requests for Environmental and Health Product Declarations (EPDs and HPDs) and wanted to let you know that ASSA ABLOY Door Security Solutions is very supportive of this initiative. We were one of the first manufacturers to join the Health Product Declaration Collaborative (HPDC) and were the first manufacture to complete an EPD, HPD and Declare label for our Trio-E high-efficiency door. We are also part of the Manufacturers Advisory Panel (MAP) that shapes the development of the HPD standard.

ASSA ABLOY Door Security Solutions is currently developing EPDs and HPDs across of vast product portfolio—mortise locks, cylindrical locks, exits, closers, doors, accessory hardware, electronic access control components. We've received your requests for information regarding our transparency efforts and would like to showcase our progress in this area.

We welcome the opportunity to meet with you and your team and present our newest GBCI and AIA continuing education course "[Opening the Door to Transparency: LEED v4, EPDs and HPDs.](#)" Let me know if you'd like to schedule an education presentation so your team can earn Continuing Education Credits and we can have a conversation around reducing environmental impacts and improving health outcomes in the building products industry. [Register here.](#)

Warmest Regards,

Aaron Smith, LEED AP BD+C
