

Is A

Hurricane Heading Your Way?

Be Prepared with Hurricane Resistant Doors from Fleming.

Do These **Five Things** Before Taking Cover — Long Before

Install a hurricane resistant assembly from Fleming — tested to withstand violent wind storms in hurricane-prone areas

Get a door that meets the design pressure of +/- 50 psf to +/- 150 psf

Make it water infiltration tight: +/-50 psf to +/-60 psf

Confirm third-party testing by UL and ITS/WH certified

Explore your hardware options including brands such as CORBIN RUSSWIN, RIXSON, SARGENT, YALE, and frame options from single and paired openings to sidelights and transom options
